EXPERIENCE

Freelance Software Developer

DigiBySR | Feb 2026 – Present

- Worked on freelance development tasks for multiple client websites.
- Fixed bugs and implemented features based on client requirements.
- Improved application maintenance and performance.

Tech Intern (Software Development)

DigiBySR | Oct 2025 – Feb 2026

- Developed backend modules for a Laravel-based Warehouse Management System.
- Implemented Role-Based Access Control (RBAC) using middleware and gates.
- Built inventory management and barcode-based tracking workflows.

Software Developer Intern

Cofnifyze Technologies | Oct – Nov 2024

- Developed Python scripts for automated web data extraction.
- Assisted in implementing API-driven backend workflows.
- Resolved runtime bugs improving application stability.

PROJECTS

MERN Interview Platform

GitHub | Live | React.js, Node.js, Express.js, MongoDB

- Built a full-stack technical interview platform with coding practice, live interview sessions, video calls, and real-time chat.
- Integrated Clerk authentication, Stream Video/Chat, and Inngest workflows for secure user management and synchronization.
- Implemented multi-language code execution for JavaScript, Python, and Java using Monaco Editor and the OneCompiler API.

MERN Ecommerce Platform

GitHub | Live | React.js, Node.js, Express.js, MongoDB

- Developed full-stack Ecommerce platform with authentication and shopping cart functionality.
- Implemented JWT-based authentication and protected checkout routes.
- Managed product filtering and search using MongoDB query-based API endpoints.

MERN Twitter Clone

GitHub | Live | React.js, Node.js, Express.js, MongoDB

- Built social media platform with post creation, follow system, and user profile management.
- Implemented JWT authentication with protected routes and authorization middleware.
- Designed MongoDB schemas for managing posts, likes, and comments.

SUMMARY

Backend-focused Full Stack Developer with hands-on experience in building scalable web applications using MERN stack and Laravel. Skilled in developing RESTful APIs, authentication systems, RBAC modules and database-driven enterprise applications.
