EXPERIENCE

Freelance Software Developer

DigiBySR | Feb 2026 – Present

- Worked on freelance assignments across multiple client web applications.
- Fixed production bugs and implemented new features based on requirements.
- Improved application reliability and overall performance.

Tech Intern (Software Development)

DigiBySR | Oct 2025 – Feb 2026

- Developed backend modules for a Laravel-based Warehouse Management System.
- Implemented Role-Based Access Control using middleware and gates.
- Built inventory and barcode-based tracking workflows.

Software Developer Intern

Cofnifyze Technologies | Oct – Nov 2024

- Developed Python scripts for automated web data extraction.
- Assisted in backend workflow implementation and structured data handling.
- Resolved runtime bugs improving system stability.

PROJECTS

Restaurant Management System

GitHub | Laravel, MySQL

- Developed Laravel-based restaurant platform with reservation workflows.
- Implemented menu, order, and customer modules with secure CRUD functionality.
- Designed booking and cart interfaces improving usability.

Financial Deal Management System

GitHub | Laravel 12, AJAX, jQuery, MySQL

- Built Laravel application with separate Admin and User dashboards.
- Implemented deal lifecycle workflows, payment tracking and PDF exports.
- Developed AJAX filters and secure Excel bulk upload functionality.

Task Management System

GitHub | Laravel 12, AJAX, MySQL

- Built multi-role task management system using Laravel middleware and gates.
- Implemented task assignment and workflow status handling.
- Used AJAX for real-time comments and updates.

SUMMARY

Backend-Focused Full Stack Developer with hands-on experience building scalable Laravel applications using PHP, MySQL, AJAX and JavaScript. Skilled in REST APIs, authentication systems, Role-Based Access Control (RBAC), and database-driven workflows. Experienced in developing enterprise applications and solving production issues across client projects.
