Credly

EXPERIENCE

Freelance Software Developer

DigiBySR | Feb 2026 – Present

- Worked on freelance assignments across client applications.
- Fixed production issues and implemented new features.
- Contributed to maintenance and workflow improvements.

Tech Intern (Software Development)

DigiBySR | Oct 2025 – Feb 2026

- Contributed to Laravel backend development for Warehouse Management System.
- Implemented RBAC and inventory workflows.
- Assisted automation tasks using Python scripts.

Software Developer Intern

Cofnifyze Technologies | Oct – Nov 2024

- Developed Python web scraping scripts and processed datasets.
- Assisted API workflows and backend automation tasks.
- Improved performance through debugging and optimization.

PROJECTS

Hiring Assistant Chatbot

GitHub | Python, OpenAI API, Streamlit

- Developed an AI-powered hiring assistant that automates initial candidate screening through an interactive conversational interface.
- Built a multi-stage interview workflow using Streamlit and OpenAI APIs to collect candidate information and generate role-specific technical interview questions.
- Implemented session-based conversation management with structured prompts to deliver a seamless and context-aware interview experience.

AI Report Maker

GitHub | Python, Streamlit, OpenAI API, LangChain, Pandas

- Developed generative AI application for automated report generation.
- Integrated OpenAI APIs for automated summarization, report generation, and structured content creation workflows.
- Processed structured datasets using Pandas for analytics workflows.

Face Detection and Mood Recognition

GitHub | Python, OpenCV, DeepFace, Tkinter, SQLite

- Built real-time face recognition and mood detection application.
- Integrated DeepFace for emotion analysis and prediction.
- Designed GUI workflow using Tkinter with SQLite-based storage.

SUMMARY

- Python Developer specializing in Machine Learning and Generative AI with hands-on experience building RAG pipelines, LLM applications, computer vision solutions, and automation tools.
- Proficient in Python, TensorFlow, LangChain, OpenAI APIs, Scikit-learn, and SQL, with experience developing AI-powered applications from concept to deployment.
- Seeking opportunities in AI/ML Engineering, Generative AI, and Data Science to build scalable, real-world AI solutions.

TECHNICAL SKILLS

Python

SQL

Git

Machine Learning

Deep Learning

TensorFlow

Scikit-learn

Generative AI

LLMs

LangChain

OpenAI API

RAG

Computer Vision

OpenCV

Pandas

NumPy

Streamlit

Prompt Engineering

EDUCATION

Master of Computer Applications (MCA)

Chandigarh University (Remote)

2025 – Present

Pursuing

Bachelor of Computer Applications (BCA)

Bengal School of Technology and Management

2025

75.4%

Diploma in CST

Kalna Polytechnic

2021

85.5%

CERTIFICATIONS

IBM Machine Learning (View Certificate)
Coursera (IBM)

TensorFlow Deep Learning (View Certificate)
Udemy

AI/ML Data Science Bootcamp (View Certificate)
Udemy
